CITIZEN-CENTRIC GOVERNMENT

The State of Michigan enhances mobile productivity and brings services directly to citizens by deploying new tablets and 2 in 1 Ultrabook™ systems

PRODUCTIVITY UP WITH ENHANCED FLEXIBILITY

CHALLENGE

Enhance government service by affordably making 47,000 employees more mobile and productive

STRATEGY

Let each employee deliver government services with one mobile device that supports a full range of functions

SOLUTION

Tablets and 2 in 1 Ultrabook™ systems with Intel® Core™ processors and Windows® 8.1 Enterprise

RESULTS

Better performance, longer battery life, and fewer devices, since one can now handle multiple functions

COSTS DOWN WITH FEWER DEVICES

“By adopting Intel® Core™ processors and the Windows® Pro operating system as our standards, we have the flexibility to choose from a broad array of device types and form factors. Whether our mobile employees need lightweight tablets, ruggedized PCs, or 2 in 1 Ultrabook™ systems, we can give them the tools they need to be successful.”

—David Behen

CIO and Director

Department of Technology Management and Budget
