

DOUBLE-DOWN MARKETING

It's no gamble when Caesars Entertainment uses big data analytics and Intel® technology to reach a new demographic with its marketing

BEFORE 6 HOURS OF PROCESSING TIME

CHALLENGE

Attract today's customers for hotels, shows, and shopping venues by understanding their wants and needs

STRATEGY

Create a new analytics engine to handle large-scale, multi-variety customer data

SOLUTION

Cloudera's CDH* on Intel® Xeon® processor E5 family, with Intel® Ethernet Converged Network Adapters

RESULTS

Caesars can process more than 3 million records an hour and fine-tune its campaigns to specific customer segments

AFTER 45 MINUTES

"We were...moving into new areas such as online social gaming, which involved unstructured and semi-structured data that our existing system was less effective at handling. We wanted to create a whole new analytics engine for this large-scale, multi-variety data, and it made sense to do that on the Hadoop platform."*

—Rizwan Patel
IT Director
Caesars Entertainment

3 MILLION + RECORDS/HOUR
